EDUCATION

B.S., National Taiwan Ocean University Fall 2022 – Fall 2025
Computer Science and Engineering

- GPA 4.0/4.0, ranked 9/125 in the department (top 7.2%); graduated a semester early
- Academic Excellence Scholarship (1st in class), Fall 2025
- CTBC Bank and Chu Chi Association Scholarships, Fall 2022 – Fall 2025
- Coursework: Data Structures, Algorithms, Operating Systems, Computer Networks, Software Engineering

RESEARCH EXPERIENCE

Database and Software Engineering Lab, NCKU Summer 2024
Research Intern · Prof. Hewijin Jiau

- Tested Kubernetes, K3s, and k0s on Ubuntu and Debian; the lab adopted my Ubuntu + k0s setup.
- Automated remote setup over SSH with Ansible playbooks and Bash scripts that the lab later reused.
- Resolved a long-running kubeconfig issue by tracing the cluster's config files.
- Researched code quality tools and joined design discussions for a Clean Code learning platform.

PROJECTS

FeelInk — Team Lead & Scrum Master Fall 2024 – Fall 2025
Capstone Project · team of 4 · React, Spring Boot, Gemini API, MongoDB
Honors: 3rd Place, InnoServe Awards; 2 Honorable Mentions; NTOU Summer Program

- Led a team of 4 as Team Lead and Scrum Master, from idea to three awards.
- Planned and designed a crisis-aware flow that scores messages on a five-level rubric.
- Built real-time chat that streams Gemini replies over Server-Sent Events.
- Set up CI/CD that ran 1,300+ JUnit and Jest tests with SonarQube on every push.
- Fixed a MongoDB outage the day before the InnoServe Awards, in time to win third place.

Class Reservation System — Team Lead & Scrum Master Fall 2024
Software Engineering Course · team of 5 · React, Spring Boot, Docker, MongoDB

- Led a team of 5 as Team Lead and Scrum Master, introducing Git branches and pull requests.
- Built the booking service, rejecting overlapping, duplicate, and banned-room requests.
- Built Firebase authentication with Google sign-in, school-email checks, and roles.
- Containerized the backend with Docker and deployed it on Render, with the frontend on Vercel.
- Planned system, API, performance, and automated UI testing, and ran the JMeter performance tests.

Health Assistant — Team Lead Spring 2024
Java Programming Course · team of 3 · Java, JavaFX, Coze AI API

- Led a team of 3 and built the shared JavaFX GUI template that every screen was built on.
- Built weekly and monthly goals with progress tracking and goal reminders.
- Saved and loaded user data as CSV files, encoded for Excel and tolerant of hand-edited files.

Peak Expedition — Team Lead Fall 2023
Web Programming Course · team of 2 · JavaScript, Node.js

- Led a team of 2 and designed the UI for every page.
- Built the home, About Us, login, sign-up, and message board pages.
- Built the backend for sign-up, login, and the message board with Express and MongoDB.

LEADERSHIP

Team Projects, NTOU Fall 2023 – Fall 2025
Team Lead & Scrum Master

- Led four team projects to on-time completion, including FeelInk, winner of three competition awards.
- Introduced Git branching and code review after early projects broke from shared files.
- Ran sprint planning, reviews, and retrospectives as Scrum Master on two projects, tracking progress on Jira.
- Settled technical disagreements by having teammates prototype the options and decide together.
- Paired with a stalled teammate until they could keep pace on their own.

TECHNICAL SKILLS

Programming: C++, Python, Java, JavaScript
Frameworks & Tech: Spring Boot, React, MongoDB, RESTful APIs
Tools: Git, GitHub, Docker
Practices: Agile/Scrum, CI/CD
Languages: Mandarin (native), English (TOEFL iBT 100 MyBest, TOEIC 875)
